

SITE 1001™

Your building is talking. Are you listening?

**THE BUILDING PERFORMANCE
AND OPERATIONS PLATFORM**

THE BUILDING PERFORMANCE AND OPERATIONS REVOLUTION HAS BEGUN.

When you put all of your building information—from photos and manuals, to real-time IoT, sensor and building systems—on one platform, you'll discover **your building tells you what to do next.**

Smarter building operations.

Mobile-first and backed by AI, the Site 1001 Building Performance and Operations Platform creates the “big-picture view” of your building. All of your building data—from design and construction, to historical records and ongoing operations—connects to and is easily accessed on one continuously updated platform, so you'll always know everything there is to know about your building.

AI-backed building performance.

Site 1001's built-in AI studies your building's health and performance, and it gets smarter every second. It learns more as more data connects to the platform, and over time creates a unique performance and operations profile for your building. Site 1001's AI engine uses that profile to uncover new efficiencies, mitigate risks and find new revenue opportunities.

The Site 1001 Advantage

INSTANT ON

Site 1001 gets you up & running fast. Site 1001's intelligent import system brings your assets into the platform and automatically associates them with the right documents, details, lists, and locations.

UNLIMITED USERS

Hate being nicked & dimed for every user? Us too. Site 1001 has no per-user licensing requirements. You get unlimited licenses so all of your colleagues, staff and vendors can use it.

ENDLESS EXPANSION

As a cloud-based platform, Site 1001 requires no hardware maintenance. Moreover, the system is infinitely scalable, allowing it to “right-size” and grow according to your exact needs.

EVERY STRUCTURE IS REMARKABLE. SITE 1001 HELPS KEEP THEM THAT WAY.

Site 1001 gives owners, operators and occupants the power to understand their buildings, and their buildings the ability to maintain their own health.

Here's how:

Location-aware asset management.

When you walk into a room, Site 1001 instantly gives you every detail about it—work order records, maintenance history, 3D models, finish specs, operations manuals, warranty information, inspection reports, even hand-written notes. And because Site 1001 uses the intuitive hierarchy of: building > area > room > asset, finding what you need when you need it has never been easier.

Real-time work order updates & alerts.

You can configure Site 1001 to notify users whenever work orders are created, edited or closed. You can also link tickets to corresponding rooms, assets or components, and track maintenance routines right from the app, making it easy to ensure your building is performing at its peak.

Built-in AI technology.

Site 1001's built-in AI works like a data detective, inspecting your building data and profiling your building ops based on what it sees. When connected to IoT devices, it can even automate tasks and engage assets to perform physical actions when it detects changes in building conditions.

Automated, customizable reporting.

Want to know how your assets are affecting your P&L? Do you know your average time to work order completion? Site 1001 can tell you. View and export asset performance, operations, and even forecasting reports using preset templates, or build your own reports via SQL queries. You can also schedule recurring sends of reports, so you & your team are always up to date.

Safe access to your secured data.

The Site 1001 platform uses industry-leading cybersecurity technology. In addition, Site 1001 has a secure operation system that prevents attacks, and alerts our security teams of threats to data confidentiality, integrity and availability. And all Site 1001 users login with a single sign-on (SSO) system that works with any existing SAML-based SSO technology.

“Site 1001 changed how we see our building. We cut open work orders by 33% in the first month alone.”

-Site 1001 User, Kansas City, MO

BENEFITS BEYOND YOUR BOTTOMLINE.

Uncover what you've been missing and find new revenue opportunities.

With a “360° view” of your building, you can find once-hidden trends inside your building, and develop smarter actions that increase the effectiveness of building operations, and boost your revenue.

Address risks before they become problems and reduce operational costs.

Site 1001 alerts you when your building needs your attention, so you see potential problems before they have a chance to become bonafide, expensive building failures. You can keep your building healthy, and not waste time or money on a should-have-been preventable breakdown.

Automate operational tasks and save man-hours.

Site 1001 allows you to schedule, track and even automate maintenance activities, eliminating the need for constant monitoring by staff, and increasing the efficiency of your building ops.

Know your building's total health and improve building performance.

The only way to keep your building healthy and living longer is to understand everything about it, and Site 1001 is the only platform that provides you with the **complete picture** of your building's health. In short, the positive impact Site 1001 has on building performance and operations is extraordinary.
