# CASINO MAINTENANCE CHALLENGES

and how **SITE 1001™** solves them

Casinos pose a special challenge for maintenance professionals. From the gaming floor to amenities such as pools, spas, hotel lodging, conference centers, business centers, restaurants, retail shopping, RV parks and golf courses—everything must be maintained and cared for to keep guests happy and your property healthy. The following are the top four problems unique to casinos, and how Site 1001 helps casino owners and operators solve those pain points and ensure their properties always run at 100%.

## Massive energy costs and management.

Thousands of light bulbs, numerous electronic displays, and large, complex HVAC systems can create high costs and lots of stress. Plus, all that excessive heat energy taxes high-dollar mechanical equipment and makes 100% occupant comfort extra difficult.

### **SITE 1001 SOLUTION:**

Site 1001 combines data from IoT sensors and building systems, and provides real-time sub-meter level usage. That lets you make faster, better building decisions and keep energy bills low.

## 24/7 custodial upkeep required.

Casinos are members of the elite “open 24/7” building family. Tens of thousands of people using your facility around the clock makes custodial maintenance a literal full-time job.

### **SITE 1001 SOLUTION:**

Like your property, Site 1001 never sleeps, constantly analyzing work orders, to-do lists, tenant requests and complaints to automatically determine task type and priority. No more unnecessary supply trips or missed tasks. With Site 1001, your property always looks its best.

## Complex safety compliance & liabilities.

Everything from push-bars on fire doors to poolside hand railings has to be up to code and in perfect working order, making up-to-date and easy-to-access records mission critical.

### **SITE 1001 SOLUTION:**

Site 1001 helps you maintain warranty and preventative maintenance schedules, and track the progress of work orders to provide full compliance with environmental, health, and safety regulations.

## Managing assets and inventory control.

Staying up-to-date with a uniquely large volume of assets is a huge cost to casinos, and tracking inventory to maintain those systems is a crucial piece of the asset management puzzle.

### **SITE 1001 SOLUTION:**

Site 1001 automatically updates data, so you can track inventory and monitor asset performance in real-time. With Site 1001, you'll *always* know everything there is to know about your building.

---

## **ABOUT SITE 1001**

Site 1001 is an AI-based building performance and operations platform that uses core building information, building systems and sensor data in combination with artificial intelligence to put the “smart” in “smart buildings.” Cloud-based, mobile first, and location-aware, Site 1001 helps owners & operators save money and improve building performance by delivering building information to the right person in the right place at the right time. Coupled with revolutionary AI technology, which can anticipate maintenance issues and automatically interact with building systems, Site 1001 users can improve efficiency, slash operations costs, and extend the life of their building’s assets and equipment without increasing workloads.
